Puppy Package w/ Lepto* - 4 Visit	\$372.30	\$438.00	\$65.70 (15%)

NOTE: The puppy plans are cost effective for puppies starting their vaccine series between 6-11 weeks of age.

The Distemper – Parvovirus combination vaccine is a multi-purpose vaccine that also includes Parainfluenza and Adenovirus (Hepatitis). This is boosted about every 3 weeks until your puppy is 16 weeks old.

Bordetella or "Canine Cough" is recommended annually for dogs that are boarded, groomed, in puppy classes/obedience classes or shows.

*Leptospirosis is a bacterial infection that is transmitted by common wildlife and rodents.
Lyme disease vaccine is also available. There will be an additional charge for this vaccine.
Please ask if these vaccines are appropriate for your puppy.*

Fecal testing and basic deworming with each visit.

All puppies at least 6 weeks of age should begin a heartworm prevention program. This will be discussed at the time of your puppy's first visit. We will dispense 1 chewable Heartworm preventative per month as your puppy grows, and then a 12 month supply can be dispensed when your puppy's growth has leveled off. The first dose of heartworm prevention is included for all puppies. Additional heartworm preventive medication is not included in the above price.

The full amount is due at the time of the initial examination and / or vaccinations. It is not refundable and no substitutions can be made.

Important Note: The Package covers only routine vaccinations and the above services. Any medical conditions and associated treatments are subject to normal fees.
